# Stainless Steel 18-8

## Machine Screws - Slotted Drive

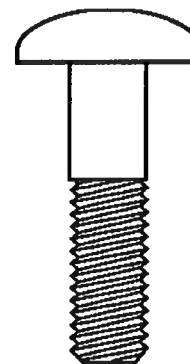

The Whitehall style of pulling boat was developed in New York City in the 1820's and quite likely took its name from Whitehall Street, where it is thought the first examples of the type were built.

Most everyone who has inherited a love of the sea feels that the clipper bow is a befitting finial to a sailing vessel, as a beautiful head of hair is to a woman. Perhaps neither the long hair nor the bowsprit is necessary, but when either is removed there is a loss of character that is hard to replace. - Francis Herreshoff

Even now, with a thousand little voyages notched in my belt, I still feel a memorial chill on casting off, as the gulls jeer and the empty mainsail claps. - E.B. White

Sharpening tools is time well spent. Much boat construction consists of accurate fitting of curved surfaces, and a really sharp tool used with only average skill will leave a curved or straight surface which has no irregularities and will fit to another.

1940

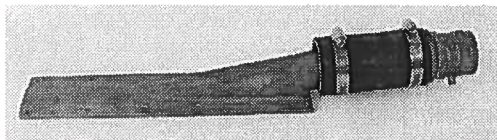

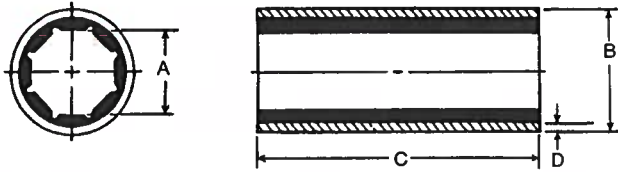

The following table shows the results of the survey conducted in the year 1940. The data is presented in a tabular format, with columns representing different categories and rows representing individual data points. The table is organized into several sections, each corresponding to a different aspect of the survey. The first section deals with the general characteristics of the respondents, including their age, gender, and education level. The second section focuses on their employment status and the nature of their work. The third section examines their income levels and financial stability. The fourth section discusses their housing conditions and access to basic services. The fifth section explores their attitudes towards various social and economic issues. The final section provides a summary of the findings and offers some conclusions based on the data collected. The table is presented in a clear and concise manner, allowing for easy comparison and analysis of the data. The use of a tabular format is particularly effective for displaying large amounts of data in a structured and organized way. The data is presented in a way that is easy to understand and interpret, making it accessible to a wide range of readers. The table is a valuable tool for analyzing and presenting survey data, and it provides a clear and concise summary of the findings of the survey.

Type B

Type X

**Type "B"** Counterbores for the flat under the head of nails, spikes and bolts to sink the heads under the surface or deep enough for wood plug to cover the heads. Can be set at any point on twist drill and held fast with two hex-socket set screws.

**Type "X"** Four blade rugged construction, cuts a smooth hole and will cut deep, fast and stay sharp longer. Stop Collars not recommended on type "X" Counterbores.

### 100% Synthetic Marine Engine Oil SAE 15W-40

Designed specifically for marine engines. Excellent rust protection - protects stored engines up to one full year. High detergent 12 TBN formula. Keeps marine engines clean and free of sludge, varnish, and carbon build-up. Excellent low temperature fluidity. Reduces friction and wear for increased life. Shear stable

Part #	Size	Price
AME01	Quart	\$4.85

### Synthetic 2-Cycle Racing Oil

When lubricating a two-cycle motor, it is essential to prevent localized welding (scuffing) between the piston and cylinder wall. When the piston expands from heat, space tolerances between the piston and cylinder walls become tighter and the likelihood of piston scuffing increases dramatically. Tightening within the cylinder increases friction and wear, robbing valuable power from the engine. The less friction within the cylinder, the more power the engine will produce. Amsoil Series 2000 2-Cycle Oil maintains a higher lubricity level than conventional petroleum oils.

Part #	Size	Price
TCRQT	Quart	\$7.95
TCRG	Gallon	\$29.75

### 2-Cycle Injector Oil

Increase power output. Improve acceleration and throttle response. Eliminate plug fouling. Reduce friction, heat, and wear. Reduces smoking. Excellent off-season protection. Contains no waxes.

Part #	Size	Price
AIO01	Quart	\$4.25

### 2-Cycle 100:1 Pre-Mix

Provides maximum protection and outstanding performance in virtually all two-cycle gasoline engines. Higher power output, lower temperatures, and cleaner operations than conventional oils. 100:1 2-cycle is formulated for pre-mixing with gasoline at a fuel/oil mix ratio of 100:1

# Amsoil For Your Boat & Tow Vehicle

## Series 2000 Synthetic Racing Oil 20W-50

Specifically designed for the demands of high performance street and racing engines. Incomparable friction reducing ability. Unique wear-protective chemistry is heat activated: the hotter the engine gets, the more Series 2000 protects. Shear Stable. Extremely low volatility. Reduces internal drag for increased horsepower and quicker response.

Part #	Size	Price
TRO01	Quart	\$7.95

## 100% Synthetic Racing Oil SAE 20W-50

Ideal for high-load street and track high performance engines. Unexcelled for reducing friction and wear. Super slippery lubricating film reduces engine drag for increased horsepower and higher rpm. Shear stable. Reduces crankcase temperatures 20 to 50 degrees. Maintains viscosity naturally - will not thicken or thin.

Part #	Size	Price
ARO01	Quart	\$6.30

## 100% Synthetic Motor Oil SAE 10W-40

For all gasoline and light duty diesel engines. Shear stable. 25,000 mile drain intervals. Improves fuel economy. Reduces engine wear. Very low pour point to ease sub-zero starting. Keeps engines clean for improved performance.

Part #	Size	Price
AMO01	Quart	\$5.45

## 100% Synthetic Motor Oil SAE 5W-30

Ideal for today's smaller, high rpm engines. Up to 25,000 mile drain intervals. Provides superior high temperature protection. Turbo-formulated. Shear stable. Low temperature fluidity for fast winter starts. Reduces friction and drag for improved fuel economy and longer engine life.

Part #	Size	Price
ASL01	Quart	\$5.65

## 100% Synthetic Motor Oil SAE 10W-30

Amsoil 100% Synthetic 10W-30 Motor Oil exceeds the lubrication requirements of all modern automobile engines. It provides tough lubricating protection in the most demanding operating conditions. Amsoil 10W-30 resists high temperature degradation and flows freely in cold conditions for superior protection against engine wear. Amsoil 10W-30 also provides maximum power and improved fuel efficiency.

Part #	Size	Price
ATM01	Quart	\$5.55

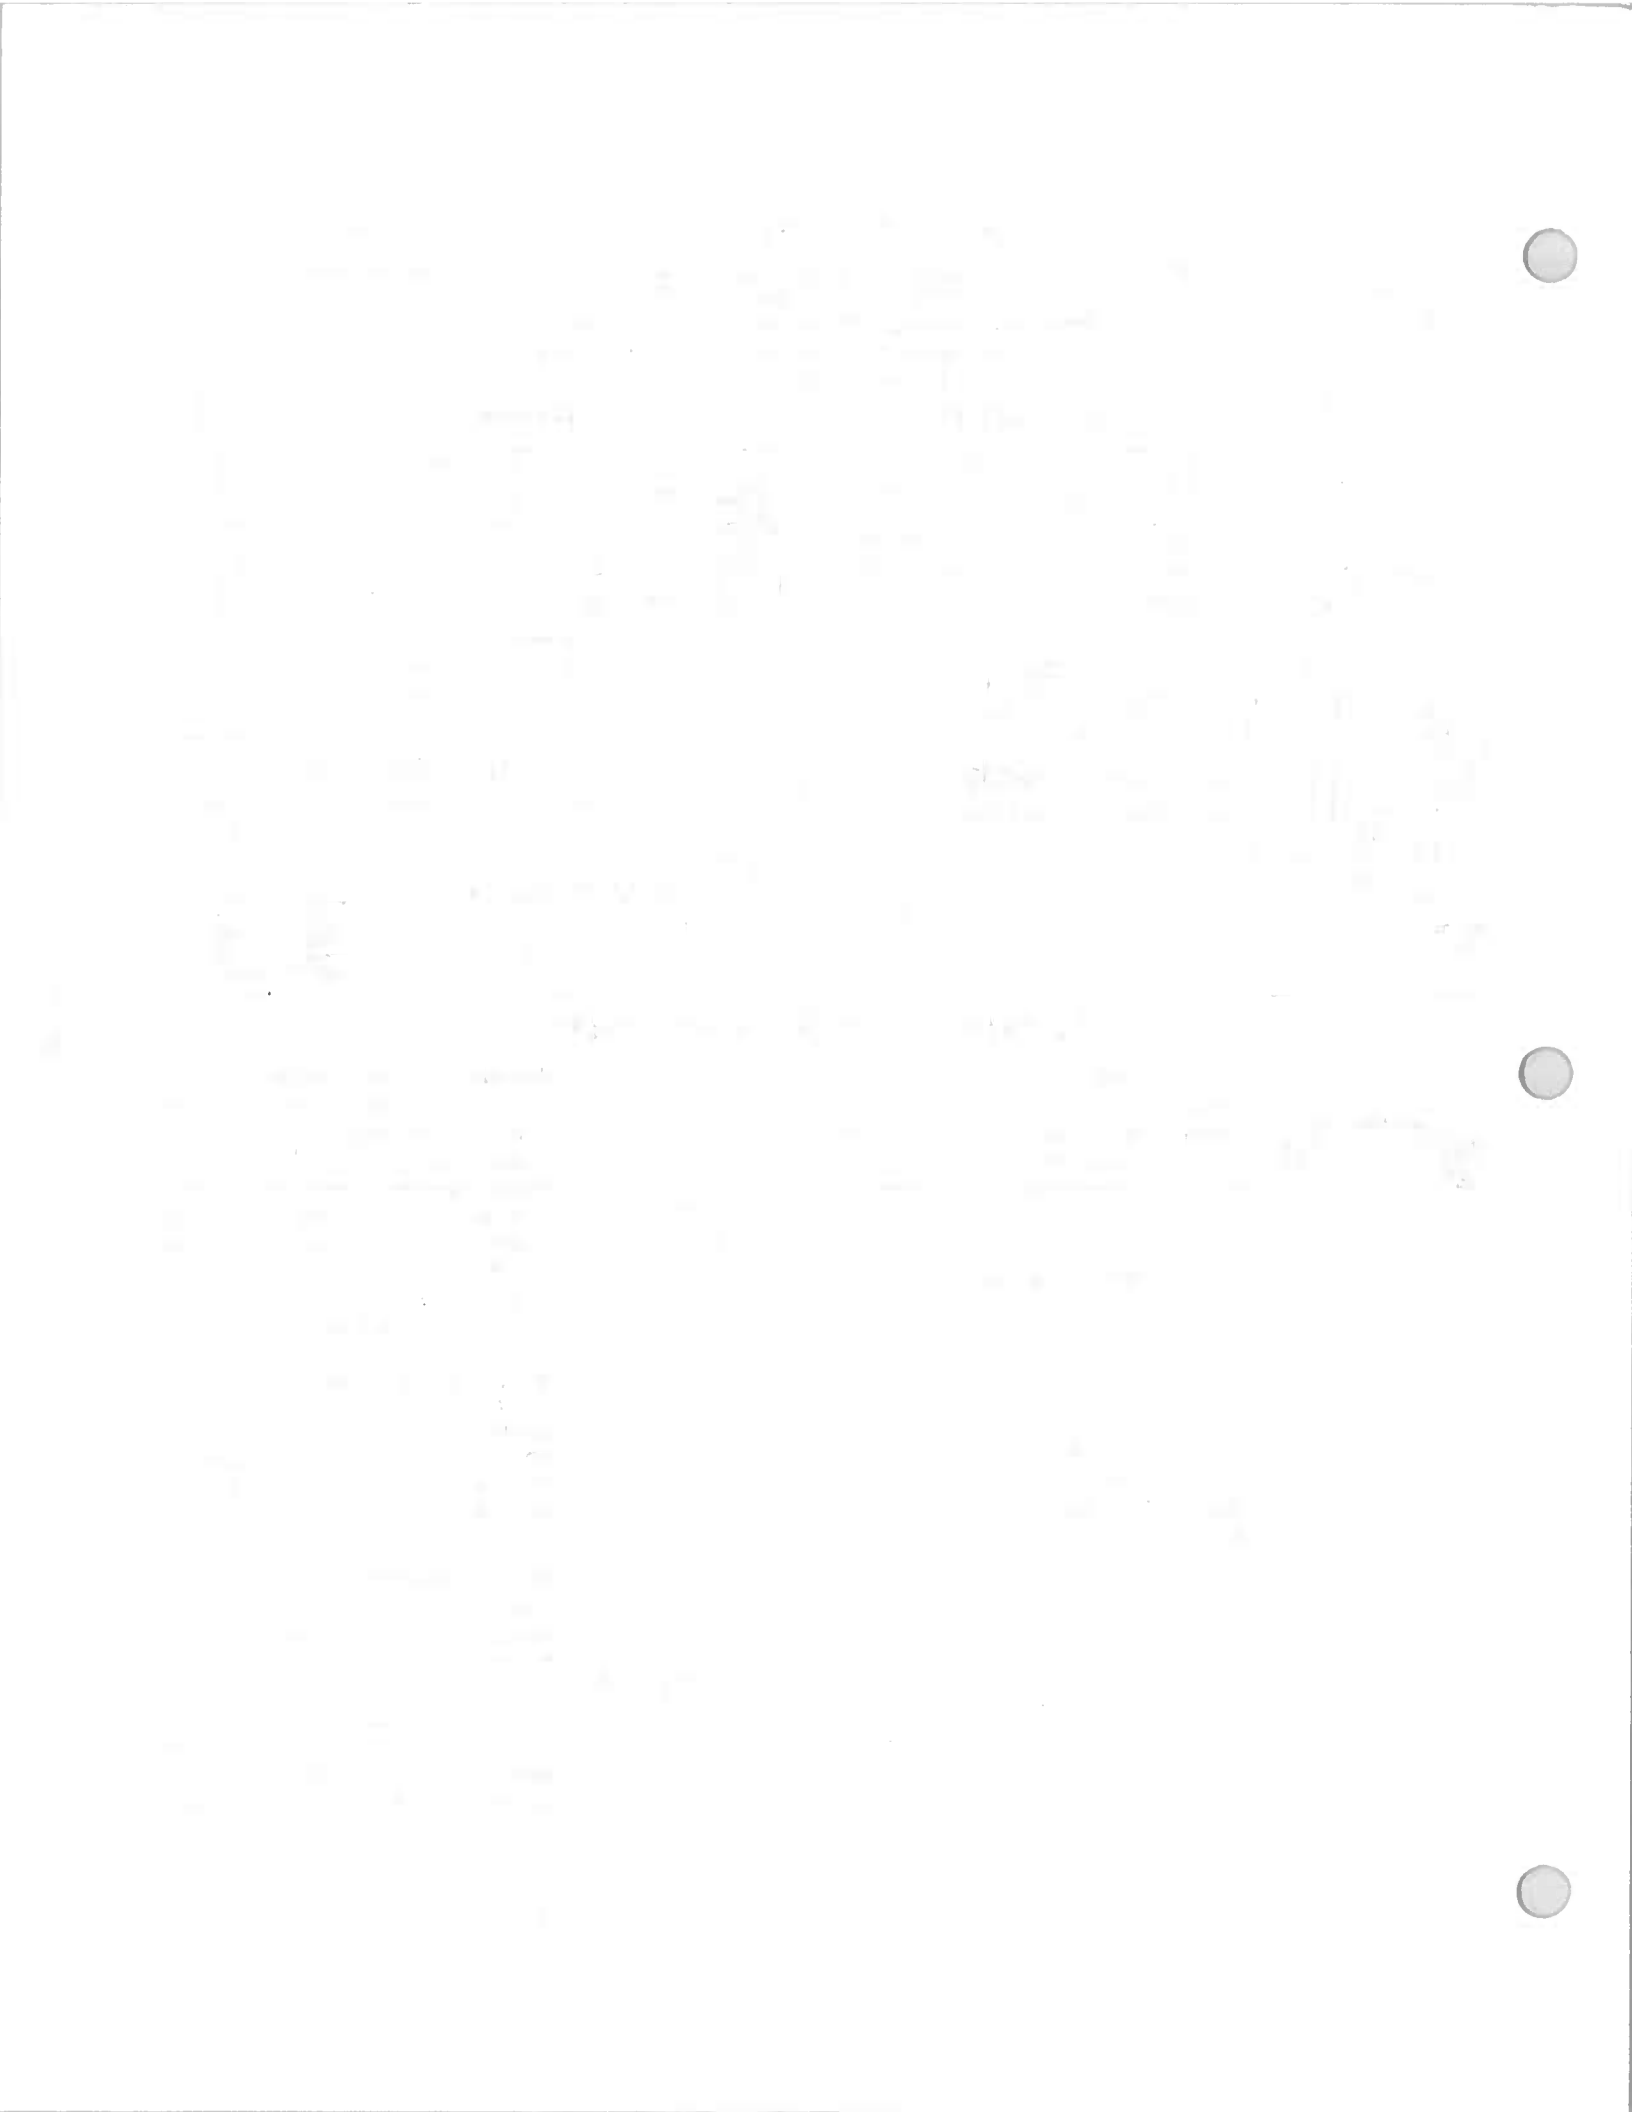

## 100% Synthetic Motor Oil SAE 0W-30

Ideal for car and light truck engines. Optimizes efficiency and power without sacrifice in wear protection that comes with many fuel-efficient, low viscosity oils. Shear stable. Engines stay cleaner longer for top performance. The ultimate in fuel efficiency.

Welcome to Southern Crown Boatworks!

Southern Crown Boatworks was formed in the early part of 1991 in Atlanta, Georgia. Historically, SCBW was involved in the restoration of antique & classic wooden boats. In the Summer of 1996, I became frustrated with the lack of suppliers dedicated to wooden boat builders, restorers and enthusiasts. After intense investigation of vendors and manufacturers, I have assembled a group of the highest quality, competitively priced, marine fasteners and supplies for the building and preservation of these beloved craft.

If there is a product you need that I do not carry in the catalog, I will do my best to locate it - be it common or scarce. I am willing to help you in any way that I can, and will try to answer your questions regarding your building or restoration project. Your comments and suggestions are very important to us and always welcome.

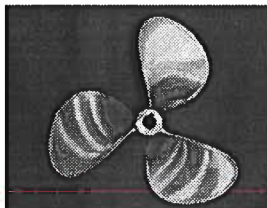

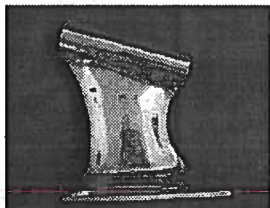

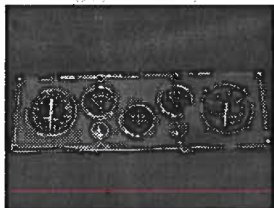

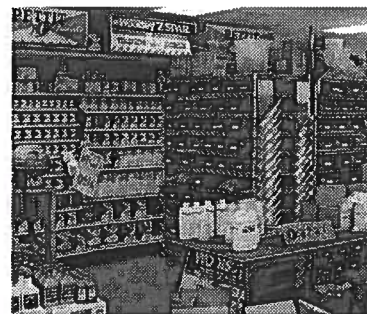

We are developing our World Wide Web location and continually update it with products and helpful hints. We also have other valuable information regarding wooden boats for sale, wooden boat shows, and clubs. Stop by and see our new showroom or visit us on the web at: [www.southerncrownboatworks.com](http://www.southerncrownboatworks.com)

1. The first part of the document discusses the importance of maintaining accurate records of all transactions. It emphasizes that proper record-keeping is essential for the integrity of the financial system and for the ability to detect and prevent fraud.

2. The second part of the document outlines the specific requirements for record-keeping, including the need to maintain original documents and to keep copies of all records for a minimum of seven years. It also discusses the importance of ensuring that records are accessible and retrievable at all times.

3. The third part of the document discusses the role of the auditor in verifying the accuracy of the records. It emphasizes that the auditor must exercise due diligence in reviewing the records and must report any discrepancies or irregularities to the appropriate authorities.

4. The fourth part of the document discusses the consequences of failing to maintain accurate records. It notes that failure to comply with the requirements may result in the imposition of penalties, including fines and imprisonment, and may also result in the disqualification of the individual or entity involved.

5. The fifth part of the document discusses the importance of ongoing education and training for all individuals involved in the financial system. It emphasizes that individuals must stay up-to-date on the latest developments in record-keeping and auditing practices.

A628G	Gallon	\$38.75

## Pettit Protect High-Build Epoxy Primer

A heavy-duty, high build, two component epoxy-polyamine coating for use where maximum resistance to fresh or saltwater is required. The complete coating system is resistant to water, many industrial chemical fumes, and very humid environments.

Part #	Size	Price
4700Q	Quart	\$19.95
4700G	Gallon	\$57.27

## Yacht White Undercoater

Designed for application to wood above the waterline. A sealer should first be used on bare wood for water resistance and dry rot protection. On rough, painted wood that needs a smoother surface for the finish enamel, they are high-build products with excellent filling properties which can be used for a full, one-coat application.

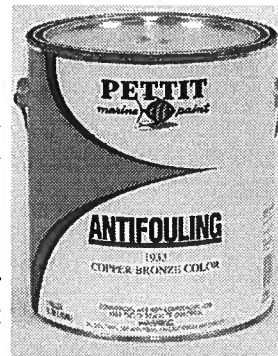

Part #	Size	Price
6165	Quart	\$13.60
6165G	Gallon	\$41.73

## Copper Bronze Antifouling Paint #1933

Copper Bronze is an excellent, general purpose antifouling for boaters desiring aggressive bottom protection in an easy to apply, cosmetically attractive finish. Copper Bronze antifouling is resistant to algae, barnacles, grass, zebra mussels, etc. Copper Bronze antifouling is equally effective in both fresh and saltwater and is also ideal for trailered boats.

## Z-Spar S-120 Clear Wood Sealer

A synthetic resin clear wood sealer. Its primary purpose is to seal and satisfy the absorption of new or bare wood. It prevents excessive absorption of vehicle from the undercoater and provides a good bond for varnishes, undercoaters and enamels. NOT FOR USE BELOW THE WATERLINE.

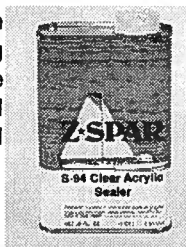

Part #	Size	Price
S120	Quart	\$11.20

## S-94 Clear Acrylic Wood Sealer

A fast drying acrylic resin sealer for use on woods such as mahogany before using filler stains and on plywood before the undercoater. Seals the grain of the wood allowing a light sanding of wood fuzz and uniform penetration of filler stain. Quart.

Part #	Size	Price
S94	Quart	\$15.04

## Clear Sealer #2018

A phenolic resin-based sealer used for priming all types of raw wood prior to painting. The sealer acts as a moisture barrier layer to prevent peeling and should be lightly sanded to a smooth surface before undercoating or varnishing. Do not use clear sealer on teak or other oily woods before varnishing or painting. (Use 2012 Super Dry Sealer). Do not use under Polypoxy.

Part #	Size	Price
2018Q	Quart	\$17.10
2018G	Gallon	\$59.00

## Super Dry Sealer #2012

A special rubber based sealer which dries rapidly and provides a tough, firm base to withstand subsequent coats of strong solvent-based products. Highly recommended in varnish systems that are applied on teak wood, because the teak oil is suppressed by the sealer. Can be brushed or sprayed. Do not use under Polypoxy.

Part #	Size	Price
2012	Quart	\$17.88

The following information was obtained from the records of the Department of Health and Human Services, Office of the Assistant Secretary for Health Policy and Statistics, regarding the activities of the National Commission on the Causes and Prevention of Violence.

The Commission was established in 1969 by Executive Order of President Lyndon B. Johnson. Its mandate was to study the causes and prevention of violence in the United States and to report its findings to the President.

The Commission's report, "The Causes and Prevention of Violence," was published in 1971. It identified several key factors contributing to violence, including mental illness, poverty, and access to firearms.

The Commission also recommended several measures to prevent violence, including improved mental health care, social and economic reforms, and stricter gun control laws.
